Confirmed carcinogen by ACGIH, IARC, OSHA AND NTP.

**Section 3: Hazard Identification**

**Potential Health Effects:**

**Acute:** Overexposure to breathing asbestos may cause asbestosis, pulmonary fibrosis, mesothelioma, other lung disorders or cancer. Handling of materials and smoking or eating prior to washing could be hazardous. Medical examination and x-rays are required to determine signs & symptoms of exposure.

**Routes of exposure:** Inhalation, Skin contact, Ingestion

**Inhalation Risk:**

Evaporation at 20 °C is negligible; a harmful concentration of airborne particles can, however, be reached quickly.

**Medical Conditions Aggravated by Exposure:**

Pulmonary disease

**Occupational Exposure Limits:**

TLV: 0.1 fiber/cc – Confirmed human carcinogen (A1).  
(ACGIH 2004. For fibers longer than 5A° with an aspect ratio equal to or greater than 3:1 as determined at 400-450X magnification by the membrane filter method).

EU OEL: 0.1 fibers/cc (EU 2003).

NIOSH REL to ASBESTOS – air: 100M TWA 0.1 fiber/cc in a 400L air sample: NIOSH DHHS #92-100, 1992.

**Incompatibilities:**

Strong oxidizers, strong acids, and bases

Route of entry: Inhalation, Skin contact, Ingestion

Target organs: Lungs

**Symptoms:**

There are not acute signs or symptoms associated with asbestos. Diseases associated with over exposure are chronic, generally taking from 10 to 40 years to become apparent. Inhalation symptom: Cough.

**Effects of long-term or repeated exposure:**

The substance may have effects on the lungs, resulting in pulmonary fibrosis and mesothelioma. This substance is carcinogenic to humans.

**Section 4: First Aid Measures**

**Eyes:** In case of contact, immediately flush eyes with copious amounts of flowing water for at least 15 minutes, retracting eye lids often. Get medical attention immediately. Contact lenses should not be worn when working with this product.

**Skin:** Wash skin thoroughly with mild soap and water. Flush with copious amounts of water for 15 minutes.

**Inhalation:** Move the exposed person to fresh air at once. Support breathing. If symptoms persist contact physician.

**Ingestion:** Get medical aid immediately.

**Section 5: Fire Fighting Measures**

**Flammability classification:** Not classified.

Heat resistant up to 500°C; is completely decomposed at a temperature of 1000°C.

**Flash Point/Method:** Not known

**Auto-Ignition Temperature:** Not determined

**Flammable Limits:**

Lower: Not applicable

Upper: Not applicable

**Extinguishing Media:** Water, Foam, Dry Chemical

**Unusual Fire Hazards:** Toxic gases and asbestos particulate may be released in a fire.

**Firefighting procedures/instructions:** Use NIOSH approved self-contained breathing apparatus and full protective equipment.

**Properties that could increase fire or explosion hazard:** Combustibility of this material results from paraffin lubrication.

### **Section 6: Accidental Release Measures**
