

Safety Data Sheet

January 2016 Page 1 of 5

1. Identification of the Substance/Mixture and of	1.1 Product Identifier
the Company/Undertaking	Material Name: Apiezon L Grease. CAS No.: 8009-03-8.
the company/ondertaking	
	1.2 Relevant identified uses of the substance or mixture and uses advised
	against
	Product Use: Sealing and lubricating grease for ultra high vacuum applications.
	Uses advised against: None.
	1.3 Details of the supplier of the substance or mixture
	Company: M&I Materials Ltd., Hibernia Way, Trafford Park, Manchester, M32 0ZD,
	Telephone: +44 (0)161 864 5409.
	Emergency Telephone: +44 (0)161 864 5439. Email: RussellMartin@mimaterials.com.
2. Hazards Identification	This product is not classified as hazardous and therefore there is no legal requirement
	to provide an SDS in Europe. This document has been compiled for information
	purposes, in accordance with Regulation (EU) No 453/2010.
	2.1 Classification of the substance or mixture
	Regulation (EC) No 1272/2008 (CLP): Not classified.
	2.2 Label elements
	Regulation (EC) No 1272/2008 (CLP): No symbol or signal word.
	2.3 Other hazards
	None.
3. Composition/Information on	3.1 Substance
Ingredients	CAS No.: 8009-03-8.
°	
4. First Aid Measures	4.1 Description of first aid measures
	Inhalation: None envisaged due to the low vapour pressure of the substance.
	Skin: Wash with soap and water.
	Eyes: Irrigate with copious amounts of water.
	Ingestion: Do not induce vomiting, obtain medical attention.
	4.0 Most immentant comptome and effects, both courts and delayed
	4.2 Most important symptoms and effects, both acute and delayed
	No adverse effects expected.
	4.3 Indication of any immediate medical attention and special treatment needed
	No special treatment required.
5. Fire Fighting Measures	5.1 Extinguishing media
	Carbon dioxide, dry powder, foam or water fog. Do not use water jets.
	5.2. Special hereards origing from the substance or mixture
	5.2 Special hazards arising from the substance or mixture
	None.

Can be wiped from surfaces and residues cleaned with water and detergent. 7. Handling and Storage 7.1 Precautions for safe handling No special precautions required.	
Can be wiped from surfaces and residues cleaned with water and detergent. 7. Handling and Storage 7.1 Precautions for safe handling No special precautions required.	
7. Handling and Storage 7.1 Precautions for safe handling No special precautions required.	
No special precautions required.	
7.2 Conditions for safe storage, including any incompatibilities	
No special precautions required.	
7.3 Specific end use(s)	
No special precautions required.	
8. Exposure Controls/ 8.1 Control parameters	
Personal Protection No relevant control parameters.	
No reconcil rococcon no reconcil parameters.	
8.2 Exposure controls	
The level of controls depends on the use. In most cases very small quantities of	
material are used. Eye washes should be available for emergency use.	
Respiratory protection: None required.	
Hand protection: Wash hands after use. For prolonged or repeated skin contact	t
gloves are recommended.	
Eye protection: None required.	
9. Physical and Chemical 9.1 Information on basic physical and chemical properties	
Properties Appearance: Semi-solid yellow grease. Odour: None.	
pH: Not applicable.	
Melting point: 42 to 52°C.	
Initial boiling point and boiling range: >500°C.	
Flash point: >200°C.	
Flammability (solid, gas): Data not available.	
Upper/lower flammability or explosive limits: Data not available.	
Vapour pressure: 7 x 10 ⁻¹¹ Torr at 20°C.	
Vapour density: Not applicable.	
Relative density: 0.896 at 20°C.	
Water solubility: Insoluble.	
Solubility: Soluble in aromatic hydrocarbon solvents.	
Partition coefficient: n-octanol/water: Data not available.	
Auto-ignition temperature: >250°C.	
Decomposition temperature: Data not available.

	Viscosity: Not applicable.
	Explosive properties: Data not available.
	Oxidising properties: Data not available.
	9.2 Other information
	Not applicable.
10. Stability and Reactivity	10.1 Reactivity
	Stable under normal conditions of use.
	10.2 Chemical stability
	Stable under normal conditions of use.
	40.0 Descibility of herendeus reactions
	10.3 Possibility of hazardous reactions
	Data not available.
	10.4 Conditions to avoid
	Temperatures >120°C.
	10.5 Incompatible materials
	Strong oxidising agents.
	10.6 Hazardous decomposition products
	None.
11. Toxicological Information	11.1 Information on toxicological effects
11. Toxicological Information	11.1 Information on toxicological effectsLikely routes of exposure: Skin and eyes are the most likely routes for exposure.
11. Toxicological Information	
11. Toxicological Information	Likely routes of exposure: Skin and eyes are the most likely routes for exposure.
11. Toxicological Information	 Likely routes of exposure: Skin and eyes are the most likely routes for exposure. Accidental ingestion may occur. Inhalation is not expected to be a relevant route of exposure. Acute oral toxicity: Low toxicity: LD50 >2000mg/kg.
11. Toxicological Information	 Likely routes of exposure: Skin and eyes are the most likely routes for exposure. Accidental ingestion may occur. Inhalation is not expected to be a relevant route of exposure. Acute oral toxicity: Low toxicity: LD50 >2000mg/kg. Acute dermal toxicity: Expected to be of low toxicity: LD50 >2000mg/kg.
11. Toxicological Information	 Likely routes of exposure: Skin and eyes are the most likely routes for exposure. Accidental ingestion may occur. Inhalation is not expected to be a relevant route of exposure. Acute oral toxicity: Low toxicity: LD50 >2000mg/kg. Acute dermal toxicity: Expected to be of low toxicity: LD50 >2000mg/kg. Acute inhalation toxicity: Low volatility makes inhalation unlikely.
11. Toxicological Information	Likely routes of exposure: Skin and eyes are the most likely routes for exposure. Accidental ingestion may occur. Inhalation is not expected to be a relevant route of exposure. Acute oral toxicity: Low toxicity: LD50 >2000mg/kg. Acute dermal toxicity: Expected to be of low toxicity: LD50 >2000mg/kg. Acute inhalation toxicity: Low volatility makes inhalation unlikely. Skin corrosion/irritation: Repeated and prolonged skin contact may cause dry skin
11. Toxicological Information	Likely routes of exposure: Skin and eyes are the most likely routes for exposure. Accidental ingestion may occur. Inhalation is not expected to be a relevant route of exposure. Acute oral toxicity: Low toxicity: LD50 >2000mg/kg. Acute dermal toxicity: Expected to be of low toxicity: LD50 >2000mg/kg. Acute inhalation toxicity: Low volatility makes inhalation unlikely. Skin corrosion/irritation: Repeated and prolonged skin contact may cause dry skin or irritation.
11. Toxicological Information	Likely routes of exposure: Skin and eyes are the most likely routes for exposure. Accidental ingestion may occur. Inhalation is not expected to be a relevant route of exposure. Acute oral toxicity: Low toxicity: LD50 >2000mg/kg. Acute dermal toxicity: Expected to be of low toxicity: LD50 >2000mg/kg. Acute inhalation toxicity: Low volatility makes inhalation unlikely. Skin corrosion/irritation: Repeated and prolonged skin contact may cause dry skin or irritation. Eye corrosion/irritation: May cause transient irritation.
11. Toxicological Information	 Likely routes of exposure: Skin and eyes are the most likely routes for exposure. Accidental ingestion may occur. Inhalation is not expected to be a relevant route of exposure. Acute oral toxicity: Low toxicity: LD50 >2000mg/kg. Acute dermal toxicity: Expected to be of low toxicity: LD50 >2000mg/kg. Acute inhalation toxicity: Low volatility makes inhalation unlikely. Skin corrosion/irritation: Repeated and prolonged skin contact may cause dry skin or irritation. Eye corrosion/irritation: May cause transient irritation. Respiratory or skin sensitization: Not expected to be a skin sensitizer.
11. Toxicological Information	 Likely routes of exposure: Skin and eyes are the most likely routes for exposure. Accidental ingestion may occur. Inhalation is not expected to be a relevant route of exposure. Acute oral toxicity: Low toxicity: LD50 >2000mg/kg. Acute dermal toxicity: Expected to be of low toxicity: LD50 >2000mg/kg. Acute inhalation toxicity: Low volatility makes inhalation unlikely. Skin corrosion/irritation: Repeated and prolonged skin contact may cause dry skin or irritation. Eye corrosion/irritation: May cause transient irritation. Respiratory or skin sensitization: Not expected to be a skin sensitizer. Aspiration hazard: Not considered an aspiration hazard.
11. Toxicological Information	 Likely routes of exposure: Skin and eyes are the most likely routes for exposure. Accidental ingestion may occur. Inhalation is not expected to be a relevant route of exposure. Acute oral toxicity: Low toxicity: LD50 >2000mg/kg. Acute dermal toxicity: Expected to be of low toxicity: LD50 >2000mg/kg. Acute inhalation toxicity: Low volatility makes inhalation unlikely. Skin corrosion/irritation: Repeated and prolonged skin contact may cause dry skin or irritation. Eye corrosion/irritation: May cause transient irritation. Respiratory or skin sensitization: Not expected to be a skin sensitizer. Aspiration hazard: Not considered an aspiration hazard. Carcinogenicity/mutagenicity: Not considered a mutagenic hazard or carcinogen.
11. Toxicological Information	 Likely routes of exposure: Skin and eyes are the most likely routes for exposure. Accidental ingestion may occur. Inhalation is not expected to be a relevant route of exposure. Acute oral toxicity: Low toxicity: LD50 >2000mg/kg. Acute dermal toxicity: Expected to be of low toxicity: LD50 >2000mg/kg. Acute inhalation toxicity: Low volatility makes inhalation unlikely. Skin corrosion/irritation: Repeated and prolonged skin contact may cause dry skin or irritation. Eye corrosion/irritation: May cause transient irritation. Respiratory or skin sensitization: Not expected to be a skin sensitizer. Aspiration hazard: Not considered an aspiration hazard. Carcinogenicity/mutagenicity: Not considered a mutagenic hazard or carcinogen. Note N: The classification as a carcinogen need not apply if the full refining history is

Safety Data Sheet

January 2016 Page 4 of 5

	12.3 Bioaccumulative potential
	Has the potential to bioaccumulate.
	12.4 Mobility in soil
	Product has low mobility in soil.
	40.5. Desutts of DDT and vDvD second work
	12.5 Results of PBT and vPvB assessment
	The product does not meet criteria for toxicity which requires further assessment. It is not considered PBT or vPvB.
	12.6 Other adverse effects
	No other adverse effects envisaged.
13. Disposal Considerations	13.1 Waste treatment methods
	Product and packaging must be disposed of in accordance with local and national
	regulations. May be incinerated. Unused product may be returned for reclamation.
14. Transport Information	Not classified as hazardous under air (ICAO/IATA), sea (IMDG), road (ADR) or rail
	(RID) regulations.
	14.1 UN number
	Not relevant.
	14.2 UN proper chipping nome
	14.2 UN proper shipping name Not relevant.
	Not relevant.
	14.3 Transport hazard class
	Not relevant.
	14.4 Packing group
	Not relevant.
	14.5 Environmental hazards
	Not relevant.
	14.6 Special precautions for user
	Not relevant.
15. Regulatory Information	15.1 Safety, health and environmental regulations/legislation specific for the
15. Regulatory information	substance or mixture
	Product is not subject to Authorisation under REACH.
	15.2 Chemical safety assessment
	A chemical safety assessment has been performed for this substance.
16. Other Information	Compiled according to regulation 1907/EC/2006 Annex II, as amended by Regulation
	(EU) No.453/2010.
	16.1 Changes from last issue:
	No significant changes.
