

Hookupz 2.0 Universal Smartphone Optics Adapter

Now you can digitally record and capture everything you see through your optical device and share instantly via text, email or social media. This adapter allows you to connect your smartphone to most any optic: microscopes, stereoscopes, binoculars, monocular, spotting scopes, telescopes, borescopes, slit lamps, night vision, and more!

The HookUpz 2.0 has been designed to accommodate all of the most popular smartphones on the market, including the larger sized phones even with their cases. It is compact, lightweight and offers a user-friendly design. Connecting your smartphone to your optic is quick and easy. The phone clamp and optic cam lock to ensure a tight grip to both your phone and the optic and fits a wide range of optics with an outer eyepiece diameter of 25-58mm. HookUpz 2.0 comes in a hard foam carrying case for storage when not in use.
